Password

Auto login ☐

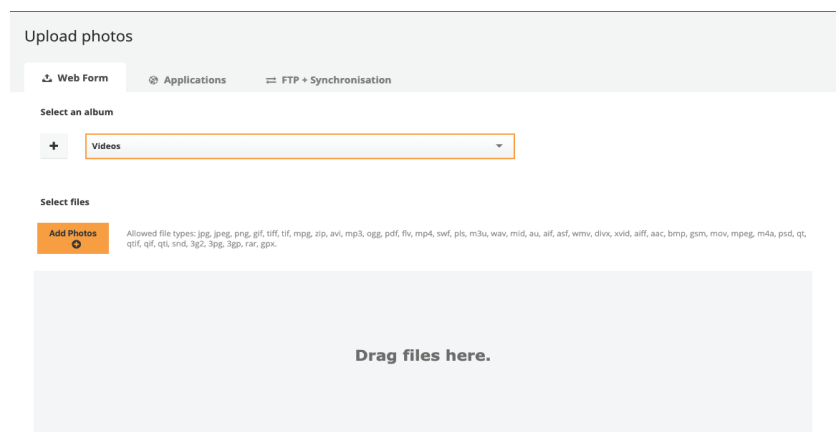

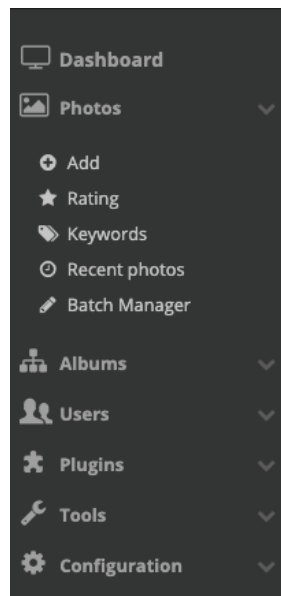

Navigate to <http://dev-spikejones.tc.uvu.edu/-media/identification.php>
Login with your credentials and click on the “Admin” page at the bottom of the home page.

Use the Admin page to Add, Delete, and Edit and of the photos to the database. The Piwigo has a really good interface to do all these actions fairly easily.

Add Photo, Video, Recording

Use this left panel to navigate to certain places for adding, deleting, and editing.

The “Add” button will take you to the page above. This is where you can add photos, videos, or recordings.

Select an album

Videos

Choose the right album to place your new photo, recording, or in this case video.

Select files

Add Photos

Allowed file types: jpg, jpeg, png, gif, tiff, tif, mpeg, zip, avi, mp3, ogg, pdf, flv, mp4, swf, pls, m3u, wex, mid, au, aif, aifc, wmv, divx, xvid, aiff, aac, bmp, gif, mov, mpeg, m4a, psd, qt, qif, qif, qif, snd, 3g2, 3gp, 3gp, rar, gpx.

file_example_MP3_700KB.mp3746 kb0%

After you have uploaded your file, you will see this screen and you can press the "Upload" button on the bottom left page.

Start upload

Successful upload of the file will bring you to this page where you can go into editing the file by clicking the "Manage this set of 1 photos". There is a better way of Editing that I found though.

Who can see this photo?

Everybody

On the photo page, as long as you are logged in as the Admin, you can see this tool menu at the top. Use this to instantly delete, or Edit the Photo, Recording, or Video.
